Water Main Valve Additions Affects Town of Ennis Residents
Scheduled Maintenance

July 19th, 2023 12:00pm: Beginning Tuesday July 25th, 2023 Ennis Public Works will begin water system maintenance in lower Ennis to add water valves to the water system. Road closures will be posted as needed, expect detours.

Beginning Wednesday July 26th, 2023 at 9am water service will be interrupted in order to place new valves. The following locations are expected to be affected by a water service interruption which should last less than 8 hours:

South First Street from Steffens Street south until South First Street ends.
Jefferson Street serviced by Town Water
South Third Street from Steffens Street south until South Third Street ends.
East Ennis Street
East Hugel Street
East Fagin Street
East Armitage Street
Riverview Drive
East Grizzly Street
South Second Street
Rodeo Drive

Once water service has been restored a Boil Order will be issued for the residents affected by the water service disruption. The Boil Order will remain in place until water samples have been tested and conform to DEQ standards.

By adding valves Ennis Public Works will be able to better isolate areas within the water system in the event of future problems. This will result in fewer customer affected by potential water events.

Ennis Public Works thanks you for your understanding and patience while the Town's water system is improved.

For updates, please visit the Town of Ennis's web page at www.ennismontana.org

Updated information will be provided once the project begins.
